

## Letter of Appreciation

Ntroduction is THE service that enhanced our business development and lead generation areas - this service enabled us to be introduced to key decision makers. We have worked with them for almost an year now and we have successfully expanded our client portfolio.

Ntroduction is definitely our long term partner.

Simply said, professionals working at mid-size companies or Fortune 500 companies introduces decision makers at these companies to companies with a right fit - companies like ours have hard time to prove ourselves to the right audience and this service not only enabled us to meet the right audience, the decision makers also treated us in par with large companies when it comes to evaluation and decision making. After all, "Who you know" is crucial and this will be our best kept secret to penetrate the market.

Best of all, Ntroduction service is very inexpensive when compared to alternative lead generation avenues we have used so far.

We wish Ntroduction team all the success.
